Aspire Ed & IT Solutions LLC

AI adoption, governance, and institutional analytics for colleges, universities, and systems

Aspire helps institutions move from having AI tools to working differently because of them. A sitting university Chief Data Officer and a production AI architect lead every engagement, build inside your own tenant, and hand over routines your people run.

RESTRUCTURING ANALYSIS	CAMPUSES' DATA UNIFIED	AI SYSTEMS IN PRODUCTION

CORE COMPETENCIES

What we do

Readiness and maturity assessment

The AI Maturity Index (AMI™), Aspire's five-level, six-dimension instrument for higher education, informed by the NIST AI Risk Management Framework and repeatable year over year.

Adoption and workforce enablement

Train-the-trainer cascades, self-governing champions networks, role-based learning pathways, and adoption measurement that reports what people use, not what was licensed.

Governance

Use policies, review boards, guardrails for Copilot and Gemini, vendor evaluation frameworks, and FERPA data-handling rules the institution can run without us.

Analytics and evaluation

Institutional-research-grade dashboards and data definitions, survey design, program and grant evaluation, enrollment and student-success analytics.

HOW WE WORK WITH CAMPUSES

- **In your tenant.** Built inside your Microsoft, Google, AWS, or Azure environment. Nothing new to host, license, or certify; the data never leaves.
- **Ownership transfers from the first workshop.** Named owners, runbooks and standard operating procedures, and a champions network that outlasts the project.
- **Principal-led.** Both principals lead every engagement personally. No rotating bench.

PRINCIPALS

Dr. Irene Irudayam

CHIEF EXECUTIVE OFFICER

Sitting university Chief Data Officer; twenty years in higher education; SACSCOC and NECHE accreditation liaison; analytical lead for a $22 million restructuring. Ed.D.

Kranthi Deepak

CO-FOUNDER AND PRINCIPAL AI ARCHITECT

Leads a generative AI practice and platform engineering at a global technology company: 8+ AI systems in production, SRE at 99.95 percent, DevOps for 30+ services. MBA.

PAST PERFORMANCE

Multi-campus public university system

HIGHER EDUCATION · IR AND ANALYTICS LEAD

Scope. Built the unified analytic model and ran scenario analysis for a restructuring against a publicly reported $22 million deficit; briefed the governing board directly.
Outcome. Analysis adopted by the board; the model retained as the system's standing planning tool.

Public university formed by the merger of three institutions

HIGHER EDUCATION · CHIEF DATA OFFICER

Scope. Founded the analytics function; unified the merged campuses' data under one governance and reporting environment; delivered executive dashboards on Power BI and Tableau and an AI enrollment-inquiry assistant.
Outcome. One reporting environment across campuses; dashboards and assistant in leadership use.

Delivered by the principals in prior roles; institutions and employers unnamed by agreement. References on request.
